

12/18/2023

This week in math, we reviewed our numbers and created a special Christmas tree number puzzle. Watch how we recognize and order numbers 1 through 10! After break, we will begin a new unit on measurement. We will meet a new measuring friend, Millie the Measuring Monkey, who will teach us new math words and different ways to measure.

Today in science, we continued with another STEM Challenge: CHRISTMAS STYLE! Students were given the Stocking Challenge: to construct a stocking for the Elves using only the materials provided (paper and glue). Then the students participated in the Ornament Challenge: to construct an ornament needed to decorate the new trees in Santa's workshop (pipe cleaners, beads, bells). And finally, the Christmas Tree Challenge: students will attempt to construct the tallest Christmas tree.

This week in music, we took a pretend sleigh ride with our jingle bells and sang one of our favorite songs, *Jingle Bells*! We have learned so much about instruments this year and look forward to learning lots more in 2023! Our new year will bring lots of fun learning in music!
